Subject Index

The page numbers refer to the first page of the entire article which contains the subject listed.

A

Acurad process and Al-Si hypereutectic alloy (390)	85
Aging of Mg-9Al-Zn alloys and effect on	
Dimensional changes	115
Electrical properties	115
Mechanical properties	115
Air pollution control	
Al alloy melt quality improvement ..	253
Filtration, degassing, fluxing for melt quality improvement	253
Aluminum alloys	
Air pollution reduction and melt quality improvement	253
Casting properties	63
Compositions of	63
Continuous casting	161
Filtration, degassing, fluxing for melt quality improvement and air pollution reduction	253
Foundry practices	63
Graphite dispersions in	
Casting of	265
Segregation of	265
Use of Ni-coated powders	265
Vortex method for producing ..	265
Melt quality improvement	253

Aluminum and zinc alloys	
Carbide dispersion in	347
Stream injection of Ni-coated particles	347
Oxide dispersion in	347
Vortex introduction of Ni-coated particles	347
Aluminum-silicon hypereutectic alloy (390)	
Acurad process for Vega engine block	85
Fluidity of	85
Machining of	85
Microstructure	85
Vega engine block casting	85
Annealability determination for	
White iron	465
Annealing of	
White iron with Cr and Mo	121
Antimony inoculation of	
Ductile iron, effect on properties and microstructure	57
Arc furnace dust	
Product development	327
Waste by-products utilization	327
Arc-melting of	
Malleable iron	
Cause of pinholing	151
Source of oxidation	151
Bentonites	
Methylene blue test for	337

Thermal durability determination ..	337
Binders (see Sand binders)	
Bismuth additions to	
Cast iron	455
Brass casting (85-5-5-5) soundness and effect of	
Pressure application during solidification	281
Solidification cooling rate effect on	
Mechanical properties	518
Microstructure	518
Bronze and	
Thermal analysis as control of chemical composition	79
Bulk arrest temperature, heavy section ductile iron	
Ce addition effect	176
Microstructure correlation and prediction	169

C

Calcium carbide, as desulfurizer for	
cast iron	415
Carbide dispersions, in Al and Zn alloys	347
Carbon monoxide, emission control in the cupola	125
Case depth, cast iron, flame or induction hardened	69
Casting defects, caused by	
High-pressure molding practice ...	421
Mold explosion	421
Water explosion	421

Casting geometry of	
White iron, effect on solidification time	483
Casting properties of	
Al alloys	63
Cast iron (see also Ductile iron, Gray Iron, Malleable Iron, etc.)	
Bi additions	455
Case hardened depth	69
Desulfurization by	
CaC ₂	415
Slags	415
Flame hardening	69
Graphite permanent molds	547
High heating rates	69
Induction hardening	69
Nitrogen solubility in	
Liquid	577
Solid	584
Pb additions	455
Surface-active agents in	455
Te additions	455
Cerium additions to	
Ductile iron, heavy section, effect on	
Bulk arrest	176
Cooling curves	176
Solidification	176
Thermal analysis	176
Clay determination, by hydrometer method	335
Closed head system, continuous casting	161
CO ₂ /Sodium-silicate (see Sodium-silicate/CO ₂)	
Coldbox process	
Corebox construction	323
Urethane-lined corebox	323
Collapsibility characteristics, Sodium-silicate/CO ₂ process	37
Composites, oxides and carbides in Al and Zn alloys	347
Composition of	
Al alloys, and effect on	
Casting properties	63
Casting quality	63
Foundry practice	63
Bronze, controlled by thermal analysis	79
Cu-Ni alloys, for high strength and corrosion resistance	145
Ductile iron, correlation with mechanical properties	225
Stainless steel, maraging, Si-hardened	25
White iron, with Cr and Mo	121
Continuous casting	
Al alloys	161
Closed-head systems for	161
Cu alloys	161
Defects	161
Flocast process	161
Graphite molds for	161
Open-head system for	161
Section shapes	161
Solidification	161
Thermal analysis	161
Unicast process	161
Zn alloys	161
Continuous casting (horizontal) of	
Gray iron shapes and tube, for economic production	31
Cooling curves (see Thermal analysis)	
Copper alloys (see also Brass, Bronze, etc.)	
Continuous casting	161
Copper-Aluminum alloys	
Composition	341
Corrosion resistance	341
Dealuminization	341
Electrochemical measurements	341
Microprobe analyses	341
Copper, as residual in	
Ductile iron	493
Gray iron	189
Malleable iron	565
Steel	547
Copper-10% Ni alloys	
Additions of Si, Cb, Al	145

Composition	145
Corrosion resistance	145
Mechanical properties	145
Weldability	145
Corebox, construction for coldbox process	323
Core making	
Binder system comparison chart	331
Phenolic-urethane nobake binders	105
Corrosion resistance of	
Cu-Al alloys	341
Cu-Ni alloys, effect of Si, Cb, Al	145
Stainless Steel	
Affected by carburization from mold	600
High Cr (ferritic)	
Effect of heat treatment	361
Effect of Ni, Si, Mn	361
Maraging, Si-hardened	25
Crack propagation, in ductile iron	351
Cupola	
Scrap melting, fragmentized steel	394
Cupola (gray iron) and Electrostatic precipitator	
Comparison with wet scrubber performance	257
Equipment evaluation	257
Operational costs	257
Curing curves, of phenolic-urethane nobake binders	105
D	
Dealuminization tendencies of	
Cu-Al alloys by electrochemical measurements	341
Defects and	
Causes from sand molding (1935-1971), history of	287
Continuous casting	161
Degenerate graphite, in ductile iron, heavy section	
Effect of Pb, Bi, Sb, Ce additions	247
Desulfurizing of cast iron by	
CaC ₂	415
Slags	415
Dimensional changes of	
Mg-9Al-Zn alloys and aging effect	115
Dross, in ductile iron	589
Ductile iron	
Cooling curves	
Solidification characteristics	399
Thermal analysis	399
Correlation of composition and effect on mechanical properties	225
Crack propagation in	351
Cu content, effect on	
Mechanical properties	493
Microstructure	493
Dross entrapment	589
Extended holding times	433
Fluxing for dross removal	589
Fracture toughness values	351
Ladle inoculation testing	433
Low-temperature testing	351
Mechanical properties	
Sb effect	57
Two-step normalizing	473
Mg	
Fading	433
Nodularity fade	594
Treatment	433
Microstructure	
Affected by additions of Sb	57
Correlation and prediction	141
Ni-Mo, effect on mechanical properties	371
Nodularity	433
Prolonged holding of	594
Sb inoculation effect on structure and properties	57
Si postinoculation effects	594
Sn content, effect on	
Mechanical properties	493
Microstructure	493
Sources, of dross in	589
Thermal analysis (ThermoQual), to correlate and predict microstructure	141

Ductile iron, heavy section	
Bulk arrest used to correlate and predict	169
Ce additions effect on	
Bulk arrest	176
Cooling curves	176
Graphite degeneration	247
Pearlite	247
Solidification	176
Thermal analysis	176
Degenerate graphite in	247
Microstructure effected by Pb, Bi, Sb, Ce	247
Thermal analysis used to correlate and predict	169
Ductility of	
Leaded red brass with Sn content reduction	157
Steel Mg, austenitic, modified	
Affected by time and temperature	449

E

Economics of production	
Gray iron shapes and tube by horizontal continuous casting	31
Effect of additions	
Ni-Mo to ductile iron for hardness and strength	371
Stainless steel, maraging, Si-hardened	25
Electrical properties of	
Mg-9 Al-Zn alloys and aging effect	115
Electrochemical measurements of	
Cu-Al alloys and corrosion resistance	341
Electron microprobe studies of	
Mn steel casting and metal penetration	377
Electrostatic precipitator	
Cupola (gray iron foundry)	257
Emission control systems and operation	257
Equipment evaluation	257
Operational costs	257
Wet scrubber performance comparison	257
Elevated temperature, sand testing (1935-1971)	287
Emission control in cupola	
Equipment and operation	125
Sulfur compounds control	125
Equipment and operation for	
Emission control in a cupola	125
Equipment evaluation	
Electrostatic precipitator for gray iron cupola melting	257
Eutectometer cooling curves and ductile iron	399
Extended holding times, for ductile iron	433

F

Filtration, degassing and fluxing for	
Al alloys melt quality improvement and air pollution reduction	253
Flame and induction hardening	
of cast iron	69
Flocast process of continuous casting	161
Flowability indicator test method for improvement for sand	445
Flowthrough volume of manganese bronze effect on solidification	15
Fluidity of	
Al-Si hypereutectic alloy (390)	85
Stainless steel, Si-hardened	25
Fluxing of Ductile iron	589
Fracture toughness values of	
ductile iron	351
Fragmentized steel scrap in cupola melting	394
Furan Hotbox binders, N-free, low-odor	
Core making	95
Gas evolution	95
Hot strength	95
Sand binders	95
Sand properties and effects	95

Storage	95
Veining	95
Future trends of risering	269

G

Gas evolution, effects using Furan hot box binders, N-free, low-odor	95
Geometry of castings, effect on solidification time of manganese bronze	15
Graphite	
Dispersions in Al alloys	
Casting of	265
Segregation in	265
Use of Ni-coated powders	265
Vortex method for producing	265
Mold used in continuous casting ..	161
Nodularity in ductile iron	
containing Sb	57
Nodule count in ductile iron	
containing Sb	57
Permanent molds for cast iron	547
Gray iron	
Continuous casting, horizontal	31
Economical production of shapes and tubes by	31
Effect of Sn and Cu residuals on	
Mechanical properties	189
Microstructure	189
Metallurgy of shapes and tubes by continuous casting	31
Shapes and tubes produced by continuous casting	31
Gray iron foundry cupola and Electrostatic precipitator, equipment performance	257
Green sand	
Angularity vs. compressibility	313
Clay content vs. friction angle	313
High density molding	313
Moisture content vs. friction angle	313
Stress-strain behavior (soil mechanics)	313
Triaxial apparatus for testing	313

H

Hardening of	
Cast iron, response to flame and induction hardening	69
White iron, with Cr, Mo	121
Heat abstraction from castings and effect on	
Binders and bonds in recycled sand	1
Thermal alteration of recycled sand	1
Heat-resisting steel, austenitic	
Compositions	45
Microstructures	45
Oxidation resistance	45
Structural studies	45
Weldability	45
Heat treatment of	
High Cr stainless steel (ferritic)	
Corrosion resistance	361
Mechanical properties	361
Ni, Si, Mn effects	361
Malleable iron	
Sn and Cu residual effects	565
Stainless steel, maraging, Si-hardened	25
Steel, austenitic Mn	449
White iron, with Cr, Mo	121
High density molding and	
Casting defects	421
Foundry sand practices	411
Green sand	313
Water explosion	421
History of	
Rising	269
Sand testing (1935-1971)	287
Hotbox process, using furan, N-free, low-odor binders	95
Hot strength	
Furan, N-free, low-odor binders ...	95
Sodium silicate/CO ₂ process	37
Hydrometer method, for clay determination	335

I

Incentive standards and	
Labor relations	321
Time study, methods improvement	320
Inclusions	
Control of dispersions	560
Dispersion of, affected by	
Mode of solidification	560
Rate of freezing	560
Induction and flame hardening, of cast iron	69
Isothermal transformation diagram, for malleable iron	479

L

Labor relations, and incentive standards	321
Ladle inoculation, of ductile iron for extended holding times	433
Lead, additions to cast iron	455
Low temperature testing, of ductile iron	351

M

Machining, of white cast iron with Cr, Mo	121
Magnesium	
Alloy (Mg-9Al-Zn), aging effect on	
Dimensional changes	115
Electrical properties	115
Mechanical properties	115
Fading, in ductile iron	433
Nodularity fade, in ductile iron	594
Treatment of	
Ductile iron	594
Ductile iron, for extended holding times	433
Maintenance management	
Aims and objectives	91
Control reports	91
Work measurements	91
Malleable iron	
Cu residual effects in	565
Ferritic, rapid batch annealing	459
Isothermal transformation diagram	479
Heat treatment	565
Microstructure	565
Pinholing	
Due to oxidized melt	515
Resulting from arc melting	515
Properties	565
Second-stage graphitization	479
Sn residual effects in	565
Malleablizing rate, for white iron ...	465
Manganese bronze	
Casting geometry, effect on	
solidification time	15
Flowthrough volume, effect on	
solidification time	15
Manganese steel castings	
Electron microprobe studies	377
Metal penetration in	377
Mechanical properties of	
Brass (85-5-5-5), effect of	
solidification rate	518
Cu-Ni alloys	145
Ductile iron	
Affected by Ni, Mo	371
Correlation with composition	225
Cu residual effects in	493
Improvement by two-step normalizing	473
Sn residual effect in	493
Gray iron	
Cu residual effects in	189
Sn residual effects in	189
High Cr stainless steel (ferritic)	
Effects of Ni, Si, Mn	361
Malleable iron	
Cu residual effects in	565
Sn residual effects in	565
Mg-9Al-Zn alloys	115
Stainless steel, maraging, Si-hardened	25

Steel

Cu residual effects in	537
Sn residual effects in	537
Melting (cupola)	
Fragmentized steel scrap	394
Metal penetration, Mn steel	377
Metal systems, Al casting operation .	469
Metallurgy, gray iron produced by horizontal continuous casting	31
Methylene blue test, for bentonites ..	337
Microprobe analysis	
Cu-Al alloys	341
Mn steel	377
Microstructure of	
Al-Si hypereutectic alloy (390)	85
Brass (85-5-5-5), effect of solidification rate	518
Ductile iron	
Correlation and prediction using thermal analysis	141
Cu residual effects	493
Heavy section	247
Sb effects	57
Sn residual effects	493
Gray iron	
Effect of Cu and Sn residuals ...	189
White iron, with Cr, Mo	121
Modified specimen tube, for sand testing	53
Mold explosion and	
Casting defects	421
High density molds	421
Molding systems and new sand additions	338
Molten metal delivery, for Al casting operations	469
Mulling	
Energy required, for sand-bentonite-water systems	213
Index, for sand-bentonite-water systems	213

N

New sand additions, to molding sand systems	338
Nickel, Molybdenum effects on ductile iron mechanical properties	371
Nitrogen solubility in	
Liquid cast irons	577
Solid cast irons	584
No-bake	
Binders, and carburization of stainless steel castings	600
Process	105
Nodularity loss, in ductile iron	433
Noise control	
Air exhaust	135
Grinding machines	135
Measurements	135
Methods	135
Transport containers	135
Vibration sources	135
Work bench modification for	135
Normalizing	473

O

Open-head system, in continuous casting	161
Oxidation of malleable iron	
As cause of pinholing	515
Resulting from arc melting	515
Oxidation resistance of	
Steel (austenitic) for heat-resisting applications	45
Oxide dispersion, in Al and Zn alloys .	347

P

Pattern shrinkage, for stainless steel, Si-hardened	25
Permanent molding, of cast irons ...	547
Phenolic novalacs and	
Sand coating study with scanning electron microscope	261
Phenolic-urethane no-bake binders and Binder efficiency	105
Compactibility	105
